## AMENDMENTS TO THE CLAIMS

The claims in this listing replace all prior versions and listings of claims in the application.

## **Listing of Claims:**

- 1.-2. (Cancelled)
- 3. (Currently Amended) The composition method according to claim [[1]] 22 wherein the composition is formulated as a chewing gum composition wherein said gum base constitutes from 10% to 99% by weight of the composition.
- 4. (Currently Amended) The eomposition method according to claim [[1]] 22 wherein said gum base comprises at least one of the following; natural or synthetic elastomeric compounds, natural or synthetic resin compounds, fillers, softening compounds, antioxidants and colorants.
- 5. (Currently Amended) The composition method according to claim [[1]] 22 wherein the composition is formulated as a confectionary composition in which said confectionary base constitutes from 0% to 99% by weight of the composition.
- 6. (Currently Amended) The eomposition method according to claim [[1]] 22 wherein said chewing gum or confectionary additives comprise at least one of the following ingredients: sweeteners, high intensity sweeteners, taste enhancers, flavoring agents, and coloring agents.
- 7. (Currently Amended) The eomposition method according to claim [[1]] 22 wherein said composition is essentially sugar-free.
- 8. (Currently Amended) The <u>composition method</u> according to claim [[1]] <u>22 wherein</u> the <u>composition comprises</u> comprising at least one additional tooth whitening agent.

- 9. (Currently Amended) The composition method according to claim 8 wherein said at least one additional tooth whitening agent is present in between 0.01% and 10.0% by weight of the composition, excluding any coating.
- 10. (Currently Amended) The composition method according to claim 8 wherein said at least one additional tooth whitening agent comprises a bicarbonate salt.
- 11. (Previously Presented) The composition method according to claim 10 wherein said at least one additional tooth whitening agent comprises sodium bicarbonate, said agent being present in between 0.3% and 0.4% by weight of the composition, excluding any coating.
- 12. (Currently Amended) The eomposition method according to claim [[1]] 22 wherein at least one of said additives and said tooth whitening agent is encapsulated.
- 13. (Currently Amended) The eomposition method according to claim [[1]] 22 wherein the composition further eomprising comprises at least one of the following: oral hygiene promoting agents, anti-calculus agents, anti-microbial agents, anti-inflammatory agents, desensitizing agents, therapeutically active agents, and remineralizing agents.
- 14. (Currently Amended) The composition method according to claim [[1]] 22 wherein the composition further comprising comprises a supplement.
- 15. (Currently Amended) The composition method according to claim 14 wherein said supplement comprises vitamin C.
- 16. (Currently Amended) The composition method according to claim 13 wherein the oral hygiene promoting agent comprises urea, said urea being present in between 0.15% and 25% by weight.
  - 17. (Cancelled)
  - 18. (Cancelled)

- 19. (Cancelled)
- 20. (Cancelled)
- 21. (Currently Amended) A method of whitening tooth surfaces by consuming a solid, oral tooth whitening composition according to claim 1, said tooth surfaces being discolored after use of tobacco-related tobacco products, the solid, oral tooth whitening composition comprising more than 75% by weight of solid materials, and the composition comprising:
  - (a) a chewing gum or confectionary base;
  - (b) chewing gum or confectionary additives; and
- (c) a tooth whitening agent comprising calcium pyrophosphate present in an amount of between 3% and 8% by weight of the composition, excluding any coating compositions.
- 22. (Currently Amended) A method of whitening tooth surfaces by consuming a solid, oral tooth whitening composition according to claim 1, said tooth surfaces being discolored after use of eoffee-related coffee products, the solid, oral tooth whitening composition comprising more than 75% by weight of solid materials, and the composition comprising:
  - (a) a chewing gum or confectionary base:
  - (b) chewing gum or confectionary additives; and
- (c) a tooth whitening agent comprising calcium pyrophosphate present in an amount of between 3% and 8% by weight of the composition, excluding any coating compositions.
- 23. (Currently Amended) The composition method according to claim [[1]] 22 wherein said calcium pyrophosphate is present in an amount of between 4.5% and 7.5 % by weight of the composition, excluding any coating compositions.

- 24. (Currently Amended) The eomposition method according to claim [[1]] <u>22</u> wherein said calcium pyrophosphate is present in an amount of between 5.5% and 7 % by weight of the composition, excluding any coating compositions.
- 25. (Currently Amended) The composition method according to claim [[1]] 22 wherein the composition is formulated as a chewing gum composition wherein which said gum base constitutes from 15% to 80% by weight of the composition.
- 26. (Currently Amended) The composition method according to claim [[1]] 22 wherein the composition is formulated as a chewing gum composition wherein said gum base constitutes 25% to 60 % by weight of the composition.
- 27. (Currently Amended) The composition method according to claim 8 wherein said at least one additional tooth whitening agent is present in between 0.1 and 2.0% by weight of the composition, excluding any coating.
- 28. (Currently Amended) The composition method according to claim 8 wherein said at least one additional tooth whitening agent is present in between 0.25% and 1.0% by weight of the composition, excluding any coating.
- 29. (Currently Amended) The eomposition method according to claim 13 wherein the oral hygiene promoting agent comprises urea, said urea being present in between 0.4% and 10% by weight.
- 30. (Currently Amended) The composition method according to claim 13 wherein the oral hygiene promoting agent comprises urea, said urea being present in between 0.8% and 5% by weight.

31. (Currently Amended) The composition method according to claim 13 wherein the oral hygiene promoting agent comprises urea, said urea being present in between 1.5 % and 2.5% by weight.
